SCORPION M-SERIES

(MODULAR-SERIES)

The SCORPION M-SERIES suppressors were developed to allow a single suppressor to be configured for use on multiple platforms. The maximum powder charge a suppressor can manage is mostly determined by the blast baffle volume. We have found by making a modular extension to the blast baffle, we can increase the capable powder charge. The M-SERIES suppressors only come in **all Titanium**.

\$975 ALL

SCORPION M-556		6MM MAX	
SHORT CONFIGURATION		LONG CONFIGURATION	
WEIGHT WITH BRAKE	11.7 OZ	WEIGHT WITH BRAKE	14.9 OZ
